Calculus (from Latin calculus, literally 'small pebble', used for counting and calculations, as on an abacus) is the mathematical study of continuous change, in the same way that geometry is the study of shape and algebra is the study of generalizations of arithmetic operations.. It has two major branches, differential calculus (concerning instantaneous rates of change and slopes of curves ...

We are here to look at a couple more examples of arc length problems.0000 The first one I have set up here is $y = x^{4/8} + 1/4x^2$.0005. So remember with the arc length, you do not integrate it directly.0012 That is a common mistake that Calculus 2 students make is just integrating the function they are given.0015 When you want to find the arc length, you have got to find the derivative f' .0019
