Dr. Sam Goldstein

Cognitive behavioral therapy (CBT) is a psycho-social intervention that aims to improve mental health. CBT focuses on challenging and changing unhelpful cognitive distortions (e.g. thoughts, beliefs, and attitudes) and behaviors, improving emotional regulation, and the development of personal coping strategies that target solving current problems. . Originally, it was designed to treat ...

Cognitive behavioral therapy - Wikipedia

In psychology and cognitive science, a memory bias is a cognitive bias that either enhances or impairs the recall of a memory (either the chances that the memory will be recalled at all, or the amount of time it takes for it to be recalled, or both), or that alters the content of a reported memory. There are many types of memory bias, including:

Summary of Research Findings "Signature strengths" refers to those character strengths that are most essential to who we are. In addition, they are strengths that usually (but not always) appear toward the top of one's profile of results after taking the free VIA Survey. Interventions and practical exercises around signature strengths are some of the most popular, frequently discussed ...
