What are voice, speech, and language? Voice, speech, and language are the tools we use to communicate with each other. Voice is the sound we make as air from our lungs is pushed between vocal folds in our larynx, causing them to vibrate.. Speech is talking, which is one way to express language. It involves the precisely coordinated muscle actions of the tongue, lips, jaw, and vocal tract to ...

Specific language impairment - Wikipedia

Language acquisition is the process by which humans acquire the capacity to perceive and comprehend language (in other words, gain the ability to be aware of language and to understand it), as well as to produce and use words and sentences to communicate. Language acquisition is one of the quintessential human traits, because non-humans do not communicate by using language.
