Computational linguistics is the scientific study of language from a computational perspective. Computational linguists are interested in providing computational models of various kinds of linguistic phenomena. These models may be "knowledge-based" ("hand-crafted") or "data-driven" ("statistical" or "empirical").

Association for Computational Linguistics - ACL Member Portal

In syntactic analysis, a constituent is a word or a group of words that functions as a single unit within a hierarchical structure. The constituent structure of sentences is identified using tests for constituents.These tests manipulate some portion of a sentence and based on the result, clues are delivered about the constituent structure of the sentence.

Constituent (linguistics) - Wikipedia

A book is a work that is published once, not as part of a regular series. Books can be revised and republished: each revision is considered a new edition of the same book. More specifically, an edited book is one that is divided into chapters, each of which is written by a different author or group of authors. If the work you are using is not divided up in this way, go to the page, Books.

APA REFERENCE STYLE: Chapters in Edited Books

Linguistics - The 19th century: It is generally agreed that the most outstanding achievement of linguistic scholarship in the 19th century was the development of the comparative method, which comprised a set of principles whereby languages could be systematically compared with respect to

their sound systems, grammatical structure, and vocabulary and shown to be "genealogically" related.

Graduate-level text explains modern in-depth approaches to the calculation of the electronic structure and properties of molecules. Hartree-Fock approximation, electron pair approximation, much more. Largely self-contained, only prerequisite is solid course in physical chemistry. Over 150 exercises. 1989 edition.

Modern Quantum Chemistry: Introduction to Advanced ...
Systemic-Functional Linguistics (SFL) is a theory of language centred around the notion of language function. While SFL accounts for the syntactic structure of language, it places the function of language as central (what language does, and how it does it), in preference to more structural approaches, which place the elements of language and their combinations as central.
