Introduction . Standard is an acknowledged measure of comparison for quantitative or qualitative value, criterion, or norm. A standard is a practice that enjoys general recognition and conformity among professionals or an authoritative statement by which the quality of practice, service or education can be judged.

Quality Assurance in Nursing: Standards - Current Nursing

Nursing is a profession within the health care sector focused on the care of individuals, families, and communities so they may attain, maintain, or recover optimal health and quality of life. Nurses may be differentiated from other health care providers by their approach to patient care, training, and scope of practice. Nurses practice in many specialties with differing levels of prescription ...

The human vagina is an elastic, muscular canal that extends from the vulva to the cervix. The opening of the vagina lies in the urogenital triangle. The urogenital triangle is the front triangle of the perineum and also consists of the urethral opening and associated parts of the external genitalia. The vaginal canal travels upwards and backwards, between the urethra at the front, and the ...
