Guncotton containing more than 13% nitrogen (sometimes called insoluble nitrocellulose) was prepared by prolonged exposure to hot, concentrated acids for limited use as a blasting explosive or for warheads of underwater weapons such as naval mines and torpedoes. Safe and sustained production of guncotton began at the Waltham Abbey Royal Gunpowder Mills in the 1860s, and the material rapidly ...

"Reading", in terms of English B assessment, means Paper 1 Texthandling, and this section of the site indeed includes tips and techniques to pass on to your students about how to deal with that paper as efficiently as possible. But exam technique will only really be of much use if the students are already trained in the general skills of reading intelligently and attentively. In this page, I ...

Don't forget that in 1974, we beamed a powerful one-time burst of a Megawatt at star cluster M13.

Hmmmm, M13 is 22,000 light years away. I don't think the signal has reached there yet.

A supercomputer is a computer with a high level of performance compared to a general-purpose computer. The performance of a supercomputer is commonly measured in floating-point operations per second instead of million instructions per second (MIPS). Since 2017, there are supercomputers which can perform up to nearly a hundred quadrillion FLOPS. Since November 2017, all of the world's fastest ...
