Macroprudential regulation is the approach to financial regulation that aims to mitigate risk to the financial system as a whole (or "systemic risk"). In the aftermath of the late-2000s financial crisis, there is a growing consensus among policymakers and economic researchers about the need to re-orient the regulatory framework towards a macroprudential perspective.

1. Introduction. Whether investor sentiment affects stock prices is a question of long-standing interest to economists. At least as early as Keynes (1936), numerous authors have considered the possibility that a significant presence of sentiment-driven investors can cause prices to depart from

fundamental values. The classic argument against sentiment effects is that they would be eliminated by ...
