Monetary economics is the branch of economics that studies the different competing theories of money. It provides a framework for analyzing money and considers its functions, such as medium of exchange, store of value and unit of account. It considers how money, for example fiat currency, can gain acceptance purely because of its convenience as a public good.

In economics, inflation is a sustained increase in the general price level of goods and services in an economy over a period of time. When the general price level rises, each unit of currency buys fewer goods and services; consequently, inflation reflects a reduction in the purchasing power per unit of money – a loss of real value in the medium of exchange and unit of account within the economy.
