1.. Introduction and motivation This paper provides empirical evidence of a strong causal relation between an important organizational feature, the structure of managerial compensation and corresponding incentives, and value-critical managerial decisions, specifically, those derived from both investment policy and debt policy.

Managerial incentives and risk-taking - ScienceDirect

In economics, a model is a theoretical construct representing economic processes by a set of variables and a set of logical and/or quantitative relationships between them. The economic model is a simplified, often mathematical, framework designed to illustrate complex processes. Frequently, economic models posit structural parameters. A model may have various exogenous variables, and those ...

Economic model - Wikipedia

Economics (/ ɛ k ə ˈ n ɒ m i k s, iː k ə -/) is the social science that studies the production, distribution, and consumption of goods and services.. Economics focuses on the behaviour and interactions of economic agents and how economies work. Microeconomics analyzes basic elements in the economy, including individual agents and markets, their interactions, and the outcomes of interactions.
