This webpage is about teaching and learning of Geography in the Eastern Cape Province, South Africa

### **Geography - Primex**

Cluster analysis or clustering is the task of grouping a set of objects in such a way that objects in the same group (called a cluster) are more similar (in some sense) to each other than to those in other groups (clusters). It is a main task of exploratory data mining, and a common technique for statistical data analysis, used in many fields, including machine learning, pattern recognition ...

Maine, constituent state of the United States of America. The largest of the six New England states in area, it lies at the northeastern corner of the country. Its total area, including about 2,300 square miles (6,000 square km) of inland water, represents nearly half of the total area of New England.

We hear a lot of talk these days about so-called "global cities." But what is a global city? Saskia Sassen literally wrote the book on global cities back in 2001 (though her global cities work dates

back well over a decade prior to that book). She gave a definition that has long struck with me.
