Nice article. Yes, it will work with any filter, as long as it is not too mean. The reason box filters are usually used though, is that the resulting convolution can be calculated very quickly by first calculating the primitive function  $F(x)$ , which is done iteratively with the formula  $F(x) = F(x-1) + f(x)$ , and then calculating the convolution as  $F(x+r) - F(x-r-1)$ , where  $r$  is the "radius ...

During the Golden Age of Islam, especially during the 9th and 10th centuries, mathematics saw many important innovations building on Greek mathematics. The most notable achievement of Islamic mathematics was the development of algebra. Other notable achievements of the Islamic period are advances in spherical trigonometry and the addition of the decimal point to the Arabic numeral system.

The importance of teaching academic vocabulary. Vocabulary instruction is essential to effective math instruction. Not only does it include teaching math-specific terms such as "percent" or "decimal," but it also includes understanding the difference between the mathematical definition of a word and other definitions of that word.
