During the Golden Age of Islam, especially during the 9th and 10th centuries, mathematics saw many important innovations building on Greek mathematics. The most notable achievement of Islamic mathematics was the development of algebra. Other notable achievements of the Islamic period are advances in spherical trigonometry and the addition of the decimal point to the Arabic numeral system.

The area of study known as the history of mathematics is primarily an investigation into the origin of discoveries in mathematics and, to a lesser extent, an investigation into the mathematical methods and notation of the past. Before the modern age and the worldwide spread of knowledge, written examples of new mathematical developments have come to light only in a few locales.

Terminology and background. Throughout this paper, the terms client and server will be used to denote the user and host parties in a direct authentication protocol. Unless stated otherwise, the client is assumed to be a human user who, like typical computer users, can only remember relatively short passwords [7, 13]. Although a user may employ a piece of software to negotiate the authentication ...
