Quantum Mechanics and Raman Spectroscopy Refute Greenhouse Theory Blair D. Macdonald First Published: 2018-10-13 Abstract Greenhouse theory's premise, nitrogen and oxygen are not

greenhouse gases as they do not emit and absorb infrared radiation presents a paradox; it contradicts both quantum mechanics and thermodynamics - where all matter above absolute 00 Kelvin radiates IR photons.

Recursion (adjective: recursive) occurs when a thing is defined in terms of itself or of its type. Recursion is used in a variety of disciplines ranging from linguistics to logic. The most common application of recursion is in mathematics and computer science, where a function being defined is applied within its own definition. While this apparently defines an infinite number of instances ...

This is a followup to my post from yesterday where I provided time-dependent model results of the day-night cycle in lunar temperatures.. One of the fascinating things about the model result (which I would not have expected) is that all other things being equal, the faster a solar-illuminated planet rotates, the warmer its average temperature will be.

### **The Faster a Planet Rotates, the Warmer its Average ...**
