Quicker Maths - Mathematics tricks and tips

The history of mathematics can be seen as an ever-increasing series of abstractions. The first abstraction, which is shared by many animals, was probably that of numbers: the realization that a collection of two apples and a collection of two oranges (for example) have something in common, namely quantity of their members. As evidenced by tallies found on bone, in addition to recognizing how to ...

One of the areas that my daughter (almost 5y/o) still gets a little confused with from time to time is the teen numbers. This is an area, in fact, that tends to confuse a lot of children and it is important that rather than just having the ability to rote-count and recognise numerals, they have a good and solid understanding of the base ten system and that teen numbers are made up from one ...
