In much of the world, high youth literacy rates suggest that illiteracy will become less and less common as younger generations with higher educational attainment levels replace older ones. However, in sub-Saharan Africa and South Asia, where the vast majority of the world's illiterate youth live, lower school enrollment implies that illiteracy will persist to a greater degree.

Taking a "future focus" in education - What does it mean? This working paper explains why the FFI (Future-Focused Issues in Education) project looks at concepts in relation to 'future focus' in The New Zealand Curriculum: sustainability, enterprise, globalisation, citizenship.. It introduces the notion of "wicked problems" - challenges characteristic of the 21st century that intertwine ...

The history of mathematics can be seen as an ever-increasing series of abstractions.The first abstraction, which is shared by many animals, was probably that of numbers: the realization that a collection of two apples and a collection of two oranges (for example) have something in common, namely quantity of their members. As evidenced by tallies found on bone, in addition to recognizing how to ...
