Piaget's theory of cognitive development is a comprehensive theory about the nature and

development of human intelligence. It was first created by the Swiss developmental psychologist Jean Piaget (1896–1980). The theory deals with the nature of knowledge itself and how humans gradually come to acquire, construct, and use it. Piaget's theory is mainly known as a developmental stage theory.

All protocols received IRB approval. Experiments 1A–1C used the same sample of 80 real-world robot faces that embodied the myriad design choices made by actual robot designers, choices that may be subtle and unexpected and may vary depending on whether the designer's intention is to build more mechanical versus more human-like robots. The size of the sample and its diversity in mechano ...
