Toxicity of heavy metals to microorganisms and microbial processes in agricultural soils: a review

Toxicity of heavy metals to microorganisms and microbial ...

Publications in Classical Genetics: At the ESP Project we believe that continued access to the foundational literature of classical genetics is critically important. Providing a collection of the full-text literature of classical genetics was the initial, primary offering of The Electronic Scholarly Publishing Project.

The age of the Earth is about 4.54 billion years. Scientific evidence suggests that life began on Earth at least 3.5 billion years ago. The earliest evidence for life on Earth is graphite found to be biogenic in 3.7 billion-year-old metasedimentary rocks discovered in Western Greenland and microbial mat fossils found in 3.48 billion-year-old sandstone discovered in Western Australia.
