Developmental psychology is the scientific study of how and why human beings change over the course of their life. Originally concerned with infants and children, the field has expanded to include adolescence, adult development, aging, and the entire lifespan. Developmental psychologists aim to explain how thinking, feeling, and behaviors change throughout life.

Positive psychology.

Socionics, in psychology and sociology, is a theory of information processing and personality type, distinguished by its information model of the psyche (called "Model A") and a model of interpersonal relations. It incorporates Carl Jung's work on Psychological Types with Antoni Kępiński's theory of information metabolism. Socionics is a modification of Jung's personality type theory that uses ...

General Overviews. Sources that directly study relationships between Hinduism and music are Beck 2012 and Beck 2014. For a study of the relationship between the more broadly construed concept of sound and its importance in underpinning the theory and practice of music, see Beck 1993. In addition to these, the majority of sources discuss Hinduism in the larger context of geographically organized ...
